Gazelle Bicycles

30 Aug 10

Here are the photos of my two old bikes.

One is clearly a Gazelle. The vinyl chain guard got caught in the chain and got ripped off. The WW2 ammo box is just wired onto the pack rack. I had to replace the pedals but I still have the originals.

The other bike, while very similar doesn't have a gazelle name on it. The brand logo does have the Dutch flag on it.

They both appear to be WW1 vintage.

Thankyou for taking an interest in my old bikes. Maybe I'll see one on your website.

Thanks

Glen
